MIGRATION UPDATE !!!!

September 2010

Dear Valued Client,

Since our last communication to you a lot has changed in the immigration world, some very positive and some of it a harsh reality of the world we live in presently.

Job Search is the new buzz in immigration circles..... and understandably so, as it provides you the candidate with the security and peace of mind that you can provide for your family in your surroundings. It is also the new benchmark for successful migration where governments are concerned and want to ensure that you are employable in their country and that your skills match their standard.

The other reality is that no matter how you look at it, things are not changing for the better at the required rate in our country and that politically the environment is very uncertain. You need to have a contingency plan at best and the time to start planning is now.

The good news is that the sluggishness and crippling effects of the recent economic downturn are receding at an encouraging level giving rise to optimism in the labour markets and we are being inundated by recruiters in Canada and Australia for qualified skills.

If you're thinking of a brighter, rewarding and more secure future abroad then the time is right for re-examining your eligibility and updating your CV to explore your career opportunities.

Trans-Global Migration has partnered with a number of professional employment and job bank organizations to assist you in securing a position in a safe, economically strong first world environment.

Contact **Trans-Global Migration** today on 011 807 9245 or 082 457 6698 and speak to a consultant about your plans, and exercise your right to choose a better future.

We look forward to being of assistance to you.

Kind regards

Trans-Global Migration
